

Local Team Action Plan to Prevent Childhood Obesity

Use this opportunity for your local team to brainstorm ideas for the development of a childhood obesity prevention plan. If your locality already has a plan, the brainstorming can focus on revision or expansion of the plan. This template uses a series of questions to stimulate discussion and provides an opportunity to capture your team's plan. There are likely many other questions that you will consider as you continue this collaboration. This action plan will not be collected – you can keep it as a record of your initial discussions.

EXPECTATION: Each team will be asked to very briefly report to all summit participants by identifying ONE top priority action item to be completed within the next 90 days.

Local Team (School Division and/or Health District):

Team Member Names and Contact Information (phone and email):

- Who will be the identified "point persons", from the local health department and the school division, to lead our collaborative efforts?

- Which community partners not represented at the summit need to be involved in the development and implementation of our local plan?
- How can we increase collaboration between the local health department and the school division? What are the potential opportunities and barriers to increasing collaboration?
- Which initiatives from the local collaborations presented by today's panelists would we like to learn more about or include in our plan?

- How can our local school division wellness policy be used to strengthen our ability to prevent childhood obesity? Who is responsible for the policy?
- Have any schools in our locality entered information in the Governor's Nutrition and Physical Activity Scorecard online?
- Have the Scorecard standards been used to establish baseline data for nutrition and physical activity practices in our schools? If not, how can we assist schools in using this tool?
- What types of additional assistance do we need from the State in order to develop and implement an effective childhood obesity prevention plan?

- What are some key actions that should be taken within the next 90 days to develop and implement our local plan?

- Who will take the lead on each of these actions?

- Report Out to Summit Participants: What is our local team's top priority action item to complete within the next 90 days?
